Marvell Structera: Overcoming Computing's Memory Challenges with Optimized CXL Devices

15-17. 2024

SAN JOSE, CA

Khurram Malik Director, Product Marketing, Marvell

Forward-looking statements

Except for statements of historical fact, this presentation contains forward-looking statements (within the meaning of the federal securities laws) including statements related to future revenue, future earnings, and the success of our product releases that involve risks and uncertainties. Words such as "anticipates," "expects," "intends," "plans," "projects," "believes," "seeks," "estimates," "can," "may," "will," "would" and similar expressions identify such forward-looking statements. These statements are not guarantees of results and should not be considered as an indication of future activity or future performance. Actual events or results may differ materially from those described in this presentation due to a number of risks and uncertainties.

Forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions that are difficult to predict, including those described in the "Risk Factors" section of our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and other documents filed by us from time to time with the SEC. Forward-looking statements speak only as of the date they are made. You are cautioned not to put undue reliance on forward-looking statements, and no person assumes any obligation to update or revise any such forward-looking statements, whether as a result of new information, future events or otherwise.

Data center server market trends

Optimizing memory-intensive workloads using CXL

CXL addresses memory-intensive applications

Introducing the Marvell[®] **Structera™** CXL product line

Structera[™] A Near-memory compute accelerators

Structera[™] X Memory-expansion

controllers

Applications

High memory bandwidth

High memory capacity

Structera A 2504: CXL 2.0 DDR5 4-channel accelerator

- CXL 2.0 / PCIe 5.0 x16 port controller
- 200 GB/s memory bandwidth
 - 4 x DDR5-6400 memory channels
 - Support for up to two DIMMs per channel
- 16 Arm[®] Neoverse[®] V2 (Demeter) cores at 3.2 GHz
- Inline LZ4 compression / decompression
- Inline AES-XTS 256-bit encryption and decryption
- Embedded hardware security module and secure boot
- Built on industry-leading Marvell 5nm IP
- Typical power consumption of <100W

Enables optimal compute and memory scaling

Deep learning recommendation model (DLRM) server

Server has 64 cores with 400 GB/s of DRAM bandwidth and consumes 400W power

6.25 GB/s per CPU core and 1 W per GB/s

Scaling compute and memory bandwidth per core critical

DLRM server example with Structera A CXL accelerator

Server has 80 cores with 600 GB/s of DRAM bandwidth and consumes 500W power

7.5 GB/s per CPU core and 0.83W per GB/s

Increases number of cores by 25% and memory bandwidth by 50%

DLRM server example with 2 Structera A CXL accelerators

Server has 96 cores with 800 GB/s of DRAM bandwidth and consumes 600W power

8.33 GB/s per CPU core and 0.75W per GB/s

Increases number of cores by 50% and <u>doubles</u> memory bandwidth

Structera X 2404: CXL 2.0 DDR4 4-channel expander

- CXL 2.0 / PCIe 5.0 1x16-port or 2x8-port controller
- 100 GB/s memory bandwidth
 - 4 x DDR4-3200 memory channels
- Support for up to three DIMMs per channel
- Support for >6TB of DRAM memory capacity
- Inline LZ4 compression / decompression
- Inline AES-XTS 256-bit encryption and decryption
- Embedded hardware security module and secure boot
- Built on industry-leading Marvell 5nm IP
- Typical power consumption of <30W

Enables recycling of DDR4 DIMMs to increase server memory capacity

Structera X 2404 enables **DDR4 memory recycling**

CXL memory expansion board

Recycle up to 12 DDR4 DIMMs per expander (up to 6TB)

Increases server memory capacity with lower CAPEX and reduces e-waste

Structera X 2504: CXL 2.0 DDR5 4-channel expander

- CXL 2.0 / PCIe 5.0 1x16-port
- 200 GB/s memory bandwidth
 - 4 x DDR5-6400 memory channels
 - Support for up to two DIMMs per channel
- Support for >4TB of DRAM memory capacity
- Inline LZ4 compression / decompression
- Inline AES-XTS 256-bit encryption and decryption
- Embedded hardware security module and secure boot
- Built on industry-leading Marvell 5nm IP
- Typical power consumption of <30W

Enables high-capacity DDR5 memory servers

Structera X 2504 enables **DDR5 memory expansion**

CXL memory expansion board

Up to 8 DDR5 DIMMs per expander (up to 4TB)

Increases server memory capacity with high-capacity DDR5 DIMMs

Structera product family overview summary

Conclusion

Thank you!
